Who Does Your Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up the efforts by at least having your printed matter done locally.

LITTLE ITEMS OF LOCAL INTERERT

English Church Harvest Thanksgiving service will be held next Sunday, Sept., 30, at 3 p.m. in the Farmers' Exchange Hall.

Elaine Torrance has been confined to her home the past week suffering from an attack of tonsilitis.

Mr. Albert Wright left on Tuesday for Edmonton, where he will take his last year in Medicine.

P.W. Rouleau of Calgary spent the week end visiting here with Mr. and Mrs. E.J. Rouleau.

S.J. Garrett commenced operations with his threshing outfit last Monday.

Commencing on Monday, October 1, the Carbon-Calgary Bus leaves Carbon every morning at 8.30 and returning leaves Calgary at 4 p.m.

John McLean and Mr. Miller of Craigmyle motored over on Sunday to Carbon. They returned that evening.

Miss McClelland of Calgary, will be open for piano lessons at the Carbon Hotel every Monday and Tuesday. 4t

The prize winners of the Carbon School Fair have been announced and a committee is at work figuring out the points for the various schools. As the points for each school is figured on the per capita attendance it is hard to say what school won the Elks cup until the attendance of the various schools of the district has been ascertained.

Clarence Hay was down from Wedaskiwin on Tuesday to take in the meeting of the Masonic Lodge.

Mr. J. Nash of the Alberta Government Telephones, was a business visitor to Carbon on Monday.

Mrs. Geo. McNeil arrived on Sunday night and is spending a few days visiting with Mrs. Edwards.

Mrs. G. Mallon and Mrs. H. Wilson were Drumheller visitors on Monday.

Mr. and Mrs. Greenan, Mrs. McKibbin and Mrs. Fairbairn were Calgary visitors this week, going in on Wednesday.

Paul Hotson, Jeweler and Optometrist, Acme, has complete eye testing apparatus here every Thursday. Entrance through Regal Gas office. Mr. Hotson is an expert in his line. tf

William E. Walker, who farms a torically known at the Senator Pope Lease, delivered a load of Combined wheat Saturday to the Alberta Pacific elevator at Hesketh, which graded straight No. 1 wheat. It was a wonderful sample of wheat, and having been combined it has an added interest to those directly interested in wheat production.

The wheat is going 40 bushels to the acre on Mr. Walker's place while last year he averaged 54 bushels to the acre, and this year 39 bushles to the acre, with a 7 per cent hail loss. —Calgary Albertan

—C. H. Bothamley, jeweler, will be at Peters Store every Thursday with an up-to-date stock of Diamonds, Watches, Jewelry, etc. First class repair work done while here. Leave repairs at Peters store.

WHEN FORD MET THE PRINCE

On his recent visit o England Henry Ford met the Prince of Wales and after shaning hands, the Prince remarked that he supposed he had shaken hands with half the people in the world

"You've got nothing on me, Prince" said Ford, "I've shaken hell out of the other half."

JACK GRADY DIES IN HOLY CROSS HOSPITAL SEPT. 23

Word has been received of the death of John Grady, who died in the Holy Cross Hospital, Calgary, on Sunday, Sept. 23.

The late Mr. Grady was 46 years of age and was a well known miner of Carbon, having lived here on and off for the past 16 years. He leaves to mourn his loss a sorrowing wife and four children who reside at Hindley Green near Wigan, Lancs. Eng. Funeral services will be held in Calgary on Thursday, Sept. 27, 1928.

CARBON TENNIS PLAYERS AGAIN PLAY AT ROSEBUD

Players from the Carbon Tennis Club journeyed to Rosebud on Sunday last in response to an invitation kindly extended to them by the Rosebud etennis club. About twenty-five Carbonites made the trip and spent a most pleasant and interesting time, the Rosebud Club proving excellent hosts. After the tennis tournament which went to the Carbon Club by four events to three, all were invited to a banquet provded by the Rosebud Tennis Club, which proved a fitting wind-up to a most enjoyable day.

Details of the tournament play are as follows:

Men's Singles—Mr. Leigh, Rosebud, defeated V. Hawkins, Carbon, 6-4. C.H. Nash of Carbon defeated T. O'Farrel of Rosebud 6-4.

Ladies Singles—Mrs. Laing of Carbon defeated Mrs. O'Farrel, Rosebud, 7-5.

Men's Doubles—Leigh and Sangster of Rosebud defeated Nash and Hawkins of Carbon 6-2. L. Poron and J. MacDonald of Carbon defeated Jones and Sangster of Rosebud 6-1.

Ladies' Doubles—Mrs. Laing and K. Ramsay of Carbon defeated Mrs. Sangster and Miss Jones of Rosebud 6-2.

Mixed Doubles—T. O'Farrel and Mrs. O'Farrel of Rosebud defeated L. Poxon and Miss K. Ramsay of Carbon 6-2

After the Club tournament and in place of the Junior events the following games were played by the younger members of Carbon and Rosebud clubs. W. Poxon Jr. and Miss Fraser of Carbon defeated Mr. and Miss Gross of Rosebud, 6-2. Mr. and Miss Jones of Rosebud defeated E. Moffit and Miss K. Watkins of Carbon 7-5.

ALBERTA SELLS RAILWAYS FOR 25 MILLION DOLLARS

Official announcement of the sale of the Alberta northern railways to the Canadian Pacific Railway was made a couple of days ago by the Alberta Government, the purchase price being $25,000,000.

The sale is subject to the confirmation and ratification of the Dominion and Provincial legislatures and the C.P.R., and subject to the express power of the Canadian National Railways to participate in half the obligation and half the benefits.

The provincial lines included in the sale are the Edmonton, Dunvegan and British Columbia Railway, the Central Canada Railway and the Alberta and Great Waterways Railway.

The C.P.R. also agrees to make additional extensions.

FOx CAR GOES OVER THE BANK

A painful accident occurred last Sunday evening about 9 p.m. when Alfred Fox ran his Star Sedan over the creek bank just east of town. Mr. Fox received a broken collar bone and a broken wrist, while another occupant of the car, whose name is not known, was said to escape without injury. The car was damaged considerably, having rolled over a number of times before coming to a standstill on the creek bank.

Another accident occurred on the Currie coulee on Friday when Chas. McMunn drove his new car over the bank. As a result Mr. McMunn is a patient in the Drumheller hospital suffering from injuries to the back.

ABOUT THE O. S. A.

With over two hundred applications on file at present, a large enrollment is pretty well assured for this year. There is still accommodation available and applications will be accepted as long as it lasts.

Not many years ago special agricultural education was considered unpractical and unnecessary; today statistics show that those farmers who are above the average in training are appreciably more successful than the untrained men. The heavy average attendance at the O.S.A. indicates that many citizens in Alberta appreciate this fact.

The purpose of the Olds School of Agriculture, which opens its doors to classes for the fifteenth time on Oct. 30th of this year, is to give to farmers and their sons that special instruction that will fit them to cope

A Double Escape

DOCTOR'S DAUGHTER'S STORY

Another Toronto home provides evidence of how a simple cut, scratch or bruise, may pave the way to deadly blood-poison, and how vital is the need for keeping Zam-Buk, always handy?

When called upon at 3, Bushness Avenue, Mrs. J. E. Zealley, daughter of the late Dr. Bevan, of St. David's, S. Wales, said:—"My boy Alfred scratched his leg with the brass tag of a shoe lace. A nasty poisoned sore developed and it defied all the usual ointments. Hearing splendid reports about Zam-Buk I decided to give it a trial. To my great relief, the balm soon caused healing to set in. All inflammation and poisonous matter was quickly removed by Zam-Buk, and it healed the sore without leaving a scar.

"Again when I fell over a steel fender and injured my knee badly, Zam-Buk alone saved me. My daughter, a nurse, was of the opinion that only an operation could remove the mass of inflammation and pus. But I again pinned my faith to Zam-Buk, and it cleansed and healed the wound." All druggists and stores sell Zam-Buk at fifty cents per box. Equally valuable for eczema, pimples, cuts, burns, etc.

WORLD HAPPENINGS BRIEFLY TOLD

Thomas Loudon, one-time Canadian sculling champion, died recently in Toronto, at the age of 87.

The first windmill 'plane has crossed the English Channel, piloted by its inventor, J. De La Cleva.

A Chinese laundry man and the employees of a millinery shop at Mexico City, divided the first prize of $400,000, in the September 14th lottery. They held number 1246 which was winner.

Permanent government flying posts in Hudson Strait are a strong possibility it was stated by Squadron Leader T. A. Lawrence, who with eight others, has returned from 16 months' service in the North.

Members of the provincial government and Lord Lovat, under secretary of state for the Dominions in the British Government, discussed the placing of British settlers on the land in British Columbia. The government offered the fullest co-operation.

French Canadians, resident of New England, may decide the presidential election. Ordinarily these states are Republican but it is thought Democrats will get the majority of the French-Canadian vote which is considerable.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

About two-thirds of all the employees in the telephone business in the United States and Canada are women and girls.

One medical authority says that the growth of children takes place entirely when they are asleep.

MOST people know this absolute antidote for pain, but are you careful to say Bayer when you buy it? And do you always give a glance to see Bayer on the box—and the word *genuine* printed in red? It isn't the genuine Aspirin without it! A drug-store always has Bayer, with the proven directions tucked in every box:

Aspirin
is the trade mark
(registered in Canada)
indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trade mark.

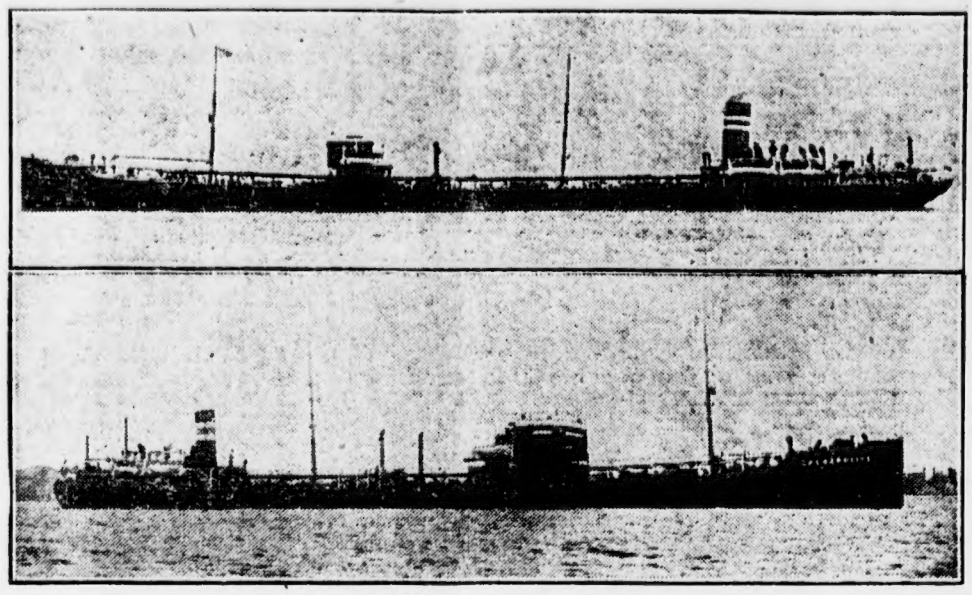
LARGEST AND FINEST OIL TANKERS SAIL UNDER CANADIAN ENSIGN



ABOVE—The "C. O. Stillman" world's largest Tanker. BELOW—The "Calgariolite" most modern of Tank ships.

With the launching in England on September 14th of the motor tank ship "Calgarolite" Canadian interests which already own and operate the world's largest tank ship, claim also the most modern and efficient of tankers, and a Canadian tanker fleet wins further eminence as one of the major oil fleets of the world.

The "Calgarolite" slipped from the ways at Haverton Hill-on-Tees with Miss Eleanor Ross, daughter of Victor Ross, Vice-President of Imperial Oil Limited, acting as sponsor. The "Calgarolite" is a 15,600 ton vessel with an indicated horsepower of 6,500, which makes her one of the most powerful and fastest tankers of her size. She is guaranteed a service speed of 12 knots. She is 540 feet long with a 70-foot beam and moulded depth of 37 feet 9 innhes. Her modern equipment will permit loading and unloading of 120,000 barrels of oil in twenty-four hours, and so she will be almost continuously in transit, serving much as an "oil ferry" between Talara in Peru, Cartagena in Colombia, and Montreal and Halifax. She will establish new figures for economical transport of petroleum.

The "Calgarolite" is the last of three large modern sea-going tankers and one lake tanker which were laid down some time ago in British shipyards for Imperial Oil. Preceding her in launching were the "Windsolite" for lake service and the "Victolite" and "Vancolite." The flagship of the fleet in which she will serve is the world's largest tanker, the "C. O. Stillman." The three sea-going ships just built in the British yards replace three Imperial vessels which went to the bottim at the hands of the enemy while transporting petroleum for the allied cause. They were the "Luz Blanca," the "Retlaw" and the "Palacine."

The motor driven tanker of today is a highly specialized vessel which is designed to move a great volume of petroleum at maximum speed and with minimum delay at loading and unloading ports. A few years ago three days was considered a quick "turnaround" for a tanker. Today, with modern pumping equipment, a tank ship turns around in twenty-four hours. That is to say, twenty-four hours after she arrives in port she has taken on or discharged her cargo and is again at sea. Consequently the modern tanker is moving practically all the time and, more than any other type ship, is the actual home of her crew. To compensate for the more continuous service, the crew is accommodated in a style that would turn the average tar green with envy. Nothing is overlooked to provide complete comfort and the sailors enjoy quarters and cuisine that compare favorably with passenger accommodation on many liners.

The Imperial Oil fleet now comprises nine large ocean-going motor tank ships: the "C. O. Stillman" of 22,175 tons, the "Victolite," "Vancolite," "Calgarolite," "Montrolite" and "Canadalite" of 15,600 tons; the "Ontariolite" and the "Reginolite" of 12,000 tons, and the "Trontolite," formerly a steam turbine vessel, which was converted into a motor ship, with a tonnage of 9,150. The combined motor tank ships carry 1,016,000 barrels of oil which they load and discharge at an average port time of twenty-four hours. It is estimated that these ships carry for about 25 per cent. cheaper than steamships of corresponding size.

In addition to the ocean tankers, Imperial Oil is operating six canal size steam driven ships on the Great Lakes. These move refined products from Halifax to various ports in the Great Lakes and to Fort William, serving the Halifax, Montreal and Sarnia refinerics. Most of these vessels tie up during the winter but in the summer it is a rare thing for one of them to have more than eight or ten hours in port. On the Pacific Coast the SS "Imperial" and two other steam vessels transport petroleum products for the company, and there is also the small motor ship, the "Marvolite," with a capacity of about 1,000 barrels. The combined capacity of the entire Imperial fleet is approximately 1,100,000 barrels; sufficient to fully load more than 5,300 tank cars, making a train 36 miles long.

The modern ocean-going tank ship contrasts interestingly with the shallow draft river boats which are used by the Imperial interests on the Magdalena River, in Colombia, and which resemble in appearance the old stern wheelers Mark Twain once piloted on the Mississippi.

Shorter Names Suggested

The Society for the Saving of Time, a newly-founded efficiency organization in France, has decided in favor of the shortening of names. It wants to limit family names to five letters and other names to two. In this way, it is declared, the business world would save millions of pounds in correspondence yearly.

A Corrector Of Pulmonary Troubles.—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Eclectric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

Banana cloth is being used now. It should make a nice little thing to slip on when you're in a hurry.

In the Wieliezki salt mines at Cracow there are altars shrines and statues made of salt.

Minard's Liniment cleanses cuts, etc.

Louis XIII. often prepared his own food in order to thwart the attempts of enemies to poison him.

Worms in children, if they be not attended to, cause convulsions, and often death. Mother Graves' Worm Exterminator will protect the children from these distressing afflictions.

The happiest people are those who are so busy they don't have time to think about whether they are or not.

Veterinaries use Minard's Liniment.

PAUL THE MISSIONARY

Golden Text: "Christ liveth in me." Galatians 2.20.

Devotional Reading: Philippians 4.4-8, 19, 20.

A Review By Means Of Allusions

There have been men like those Jews in every age and every land who have delighted in stirring up others. There is no community free from them.

"Nurse Cavell in Belgium was hemmed in by a brutal soldiery who gnashed on her with their teeth, and she was at once heroic and tender and forgiving."

When men refuse to retain God in their knowledge, they can hardly expect to be secure from the temptation to bow before creatures of like passions with themselves, whether they be cunning adventurers or heartless tyrants.—The Christian.

"The supernatural is the native air of Christianity, its cradle-song is that of angels, its death-chant the triumphant exclamation, 'Behold, I see the heavens opened.'"

We are daily judging ourselves unworthy of divine grace in every act of refusal to accept and rely on it.—Lyman Abbott.

"There stood a man of Belgium saying, 'Come over and help us,' and immediately men of Britain arose to answer the call."

We cannot think of the vastness of the universe without feeling that we are citizens of no mean city, but perhaps we should be more impressed by the order and the uniformity of the heavens.—J. Arthur Thomson.

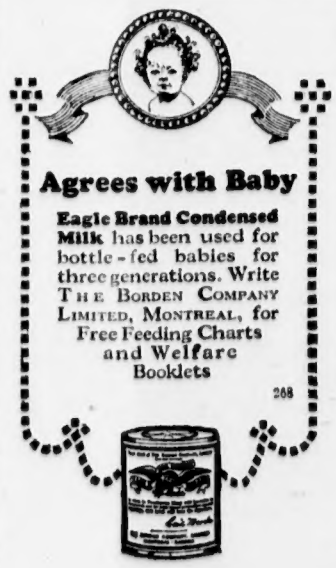
"When came the Sabbath of worship and rest,
Out of the city, in reverent quest,
Down by the riverside faithful ones came,
Where prayer was wont to be made in His name."

The world has often had its dreams of gods who had come down in the likeness of men, and even of a divine influence pervading all things; but no ethnic religion has told how men may come to God.—H. E. Fox.

"The talk of Lenine was overbearing and belligerent as he breathed out threatenings and slaughter on the road to Genoa."

"What is all this solar energy compared to that boundless supply of divine grace—always available to the believing heart! Therein lies power to turn the world upside down, if only the people of God would receive and transmit what he is so willing to bestow!—The Christian.

Life is like a race. Speed up and you cover more ground, but you get to the end more quickly.



Aluminum serves mankind in many ways—one of them being as a container for fine teas. All Red Rose Tea is put up in clean, bright aluminum, thus insuring its coming to your table as fresh and flavory as the day it was packed. F-W

Canadian cheese shipped from Montreal in a single week to foreign markets totaled more than 55,000 boxes, an increase of nearly 20,000 boxes compared with the same week a year ago. Prices paid at country points were records for the year to date.

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe Or the Growing Child

There is no other medicine to equal Baby's Own Tablets for little ones—whether it be for the newborn babe or the growing child the Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Armour, R.R. 1, South Monaghan, Ont., says:—"We have three fine, healthy children, to whom, when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fever and make teething easy. They are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

It is said man can now fly five times as fast as a bird. Maybe so, but you hardly ever hear of a bird coming down out of control.

No man can cut a wide swath who always has an axe to grind.

BABY GIRL HAD DIARRHŒA WHEN CUTTING TEETH

Mrs. A. J. Murray, Gull Lake, Sask., writes:—"Last summer, my baby girl was cutting teeth and became very weak with the effects of diarrhœa. I didn't know just what to do for her as she couldn't retain anything. At last one of my neighbors said to me, 'Haven't you any

why, I wouldn't be without it where there are children.'

"My husband went to town and got a bottle, and the very first dose helped her wonderfully, and in three days she was well over the diarrhœa and was running around as well as ever."

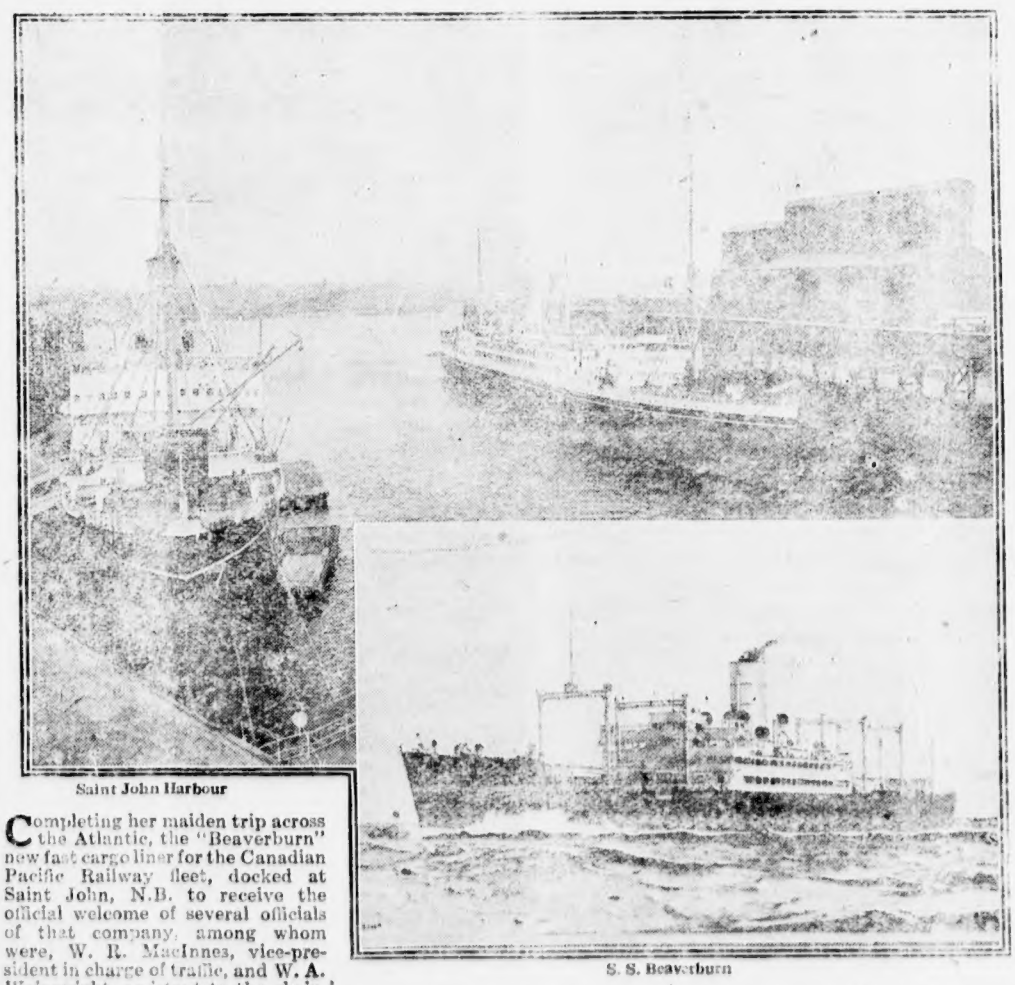
First of New Fleet at Saint John



Saint John Harbour

S. S. Beaverburn

Completing her maiden trip across the Atlantic, the "Beaverburn" new fast cargo liner for the Canadian Pacific Railway fleet, docked at Saint John, N.B. to receive the official welcome of several officials of that company, among whom were, W. R. MacInnes, vice-president in charge of traffic, and W. A. Wainwright, assistant to the chairman, Canadian Pacific Steamships Limited, also the harbour officials of that port. A thorough inspection was made of the vessel and appreciation of her qualities was expressed.

The Beaverburn is the first of five fast cargo vessels, which will be known as the "Beaver" class, displacing 10,000 tons and having a length of over 500 feet. These ships are capable of making the ocean passage in ordinary weather conditions at an average speed of fifteen knots, the Beaverburn however, attained a speed of 16 knots on her trial trip.

These cargo ships will provide a weekly departure from Canada every Friday, arriving in London nine and a half days later. Montreal is to be their Canadian port during the summer and Saint John in the winter. The liners are considered the finest and highest class of cargo ships afloat today. Another member of the passenger style, the Duchess of Bedford will be launched at the Clydebank shipyards January 24.

Altogether there are to be five Duchess liners attached to the Canadian Pacific Steamships. To date the Duchess of Atholl has been launched, the Duchess of Bedford will be launched shortly, while in 1929 the third and fourth to be delivered will be Duchess of Richmond and Duchess of Cornwall, with one more ship to come.

An Inspiring Sight

The prairies of Western Canada during this year of grace, 1928, have been a joy to behold. In the early summer following the June rains the tender verdant green of the recently sown grain crops presented a restful picture full of promise for the future. As week followed week of almost ideal growing weather, with only an occasional storm affecting restricted areas, and an absence of rust and insect pests, the early promise of a bountiful crop grew steadily into a certainty.

Inspiring as the prairies were in early spring and the first days of summer, and full of promise as they were, as the crops became taller and the heads began to develop and fill out as they swayed to the passing breeze, it is in the late summer and early fall months that the West really comes into its own and presents a picture which few places in the world can rival and none surpass.

This article is written in mid-September when days of unsurpassed sunshine prevail, each day closing with a glorious sunset, the promise of still another day of perfect harvest weather to follow. The writer has just completed a motor trip through hundreds of miles of grain fields. And what a sight! If the pessimists of our Dominion could make such a trip surely their croaking voices would be silenced.

Speeding along almost perfect roads, albeit only well graded dirt roads, whether over prairie as level as a billiard table, or with the feeling of a bird rising and dipping as the car speeds over more rolling country, dropping into a valley here and winding up through the hills, only one sight reaches the eye, and that panorama extends unchanged as far as the eye can reach,—a seemingly limitless expanse of yellow golden grain. The whole country is golden yellow.

And no great industrial city in the world can show a scene of greater activity. On all sides can be heard the click and clatter of the binders as they cut down the ripened grain and with automatic carelessness toss the bound sheaves to one side, ready for the stookers. With amazing frequency the sight is witnessed of the newer combines—reaper and thresher—some using the swather attachment, others threshing the grain as the big machines move onward with the irresistibility of a tank in modern warfare. In some fields the harvest hands are busy in groups gathering the sheaves into stooks; across the road a threshing gang is at work, horses hauling great racks or stook-loading machines, pitchers, engineers, firemen, drivers, all covered with dust and working at high pressure to accomplish a maximum of work before daylight fails.

And as one speeds along the road it becomes a necessity to slow down and turn out every few minutes as we pass, or allow to pass, a box wagon or motor truck loaded to capacity with the wheat being hurried to the elevators, those far from artistic but essentially modern and practical adjuncts to twentieth century grain raising and marketing. Every road is alive with them, great wagons drawn by teams, double teams, horses three abreast countless new motor trucks, strings of wagons hauled by a tractor, driven by old men and young, boys hardly in their teens, women and girls, all headed to the nearest railway station.

And these small prairie towns and villages tarough which we pass every eight or ten miles all present the same scene of tireless activity. The loaded grain wagons and trucks are lined up awaiting their turn to reach the elevators, while the "putt, putt" of the engines testify to the energy with which the elevator operator is striving to keep up with the golden stream pouring in upon him. At the same time is heard the "hiss" of the grain as it is emptied through the elevator chutes into the waiting freight cars All night long the elevators struggle with the gigantic task before them and through the night the long trains plunge through the darkness hurrying the proceeds of the farmers' toil to the hungry markets of the world.

And where are those tens of thousands of harvesters from Eastern Canada, British Columbia, and the miner-harvesters from over the sea, which only a few days ago thronged our cities and larger town distributing centres? Scattered singly or in groups they have been swallowed up in the grain fields of Canada's prairie provinces. They have been merged into and become a part of the Epic of the West. They are working hard, but they are, too, catching a glimpse of a new life and it is inconceivable that they will fail to become imbued with some of the courage, the optimism, the vision of this great new land.

September days in Western Canada! Glorious days, health-giving, wealth-giving.

A New Wireless Wonder

Apparatus Supplies Heat Without Apparent Direct Contact

The latest performances in which wireless is employed consist of supplying heat to bodies without establishing apparent direct contact between the heater and the heated body, and lighting lamps without any apparent electrical supply.

These are done by power obtained from a new short-wave vacuum tube. High frequencies are produced at high power, using a short-wave length.

Foodstuffs have been enclosed in a glass tube and hung from the end of a metallic "aerial" that receives the transmitted power and conveys it to the food in the form of heat and cooks it.

New methods in electrical treatment are always being looked for by doctors. Perhaps, in the future, this new apparatus will be used for imparting heat to the body to produce artificial "fever," one of Nature's most prevalent factors in recovery from many diseases.

Foot Comfort

For aching feet use **Minard's.** Soothes and relieves pain.

MINARD'S "KING OF PAIN" LINIMENT

Explanation Is Simple

Exceedingly strange are the whys and wherefores of names. Take, for instance, the letter "Q"—how many of us have ever stopped to think or to ask ourselves why we call it "Q". And the answer is just as strangely curious as the question. The name of the letter "Q" is from the French word "queue" meaning "tail." "Q" is simply an "O" with a tail!

The prison population of England and Wales has decreased from 20,000 to 10,000 since 1878.

New Use For Radio Waves

Will Kill Germs Found In Milk, Says Austrian Professor

Radio waves will kill germs found in milk, according to a report received by the medical college of the University of California from Dr. Karl Seidel of the University of Vienna.

Research done by the Austrian professor indicated that intense radio beams of very short wave length will kill germs without altering the milk molecules nor changing the natural flavor, the report says.

HAD NO APPETITE WEAK AND DIZZY

This New Brunswick Woman Restored By Dr. Williams' Pink Pills

Mrs. James Belyea, Brown's Flat, N.B., says:—"I am writing to tell you the great good I had through the timely use of Dr. William's Pink Pills. My health had failed and I was troubled with great weakness: I had no appetite and frequently had dizzy spells. The least exertion would make my heart palpitate violently and I felt tired at all times. I had doctored a great deal without getting much relief, and was feeling greatly discouraged when I finally decided to try Dr. Williams' Pink Pills. The happy results following the use of this medicine can best be summed up by saying that I am again perfectly well, able to do my housework and enjoy life once more. I feel it a duty to recommend Dr. Williams' Pink Pills to all weak people."

If you have any, or all, of the symptoms above noted, do not delay, begin treatment at once with Dr. Williams' Pink Pills. You will be surprised to note the improvement in your condition after a few weeks. You can get these pills through any dealer in medicine or by mail at 50 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont. If you will send your name and address a little booklet, "Building Up the Blood," will be sent free.

Ex-Kaiser Recovers Farms

Former Kaiser Wilhelm of Germany, has won a suit for the recovery of two confiscated farms. The farms were seized by the Government of the Union of South Africa, in 1920. The case is considered important as setting a possible precedent for actions to recover the former imperial estate in other countries, notably in Poland.

Painless and perfect in their action, Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognizable in a feverish restlessness, frequently ending in convulsions. A point of notable importance is that after Miller's Worm Powders have expelled the worms, the stomach and bowels are toned up into a very healthy condition.

Intelligent Congressman

Shipowner: We must have government aid! Congress does not realize how expensive it is to operate a ship Why, barnacles alone cost American ships $100,000,000 a year.

Congressman: You ought to cut that item down. Use a cheaper grade of barnacles, or get along with fewer of them.

When Asthma Comes do not despair. Turn at once to the help effective—Dr. J. D. Kellogg's Asthma Remedy. This wonderful remedy will give you the aid you need so sorely. Choking ceases, breathing becomes natural and without effort. Others, thousands of them, have suffered as you suffer but have wisely turned to this famous remedy and ceased to suffer. Get a package this very day.

Turks Are Progressing

Dictator Kemal Pasha is compelling the Turks to abandon the Arabic alphabet and to learn the Latin alphabet. Turkey is more progressive than the Irish Free State with its compulsory Gaelic. While the Turk goes forward the Celt goes back.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Eclectric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

"Not by appointment do we meet delight and joy; they heed not our expectancy: But round some corner in the streets of life they on a sudden clasp us with a smile."

Milk May Be Sold In Sheets

Danish Farmer Has Invented Wonderful New Machine

The world is used to several varieties of prepared milk and to milk powder, but shortly it will be made, and sold, in sheets.

A landed proprieitor at Copenhagen has invented a device which extracts the water from fresh milk and leaves dry milk which comes from the machine in a form resembling sheets of rather heavy tissue paper. In this form the milk, it is stated, can be kept for years, and becomes "fresh milk" again by mixing it with lukewarm water.

It is intended to build a factory to make this "sheet milk," which should be important to agriculture.

Locating Rome

An American mother and daughter had made an exhaustive tour of the Continent. When they returned to their "home town" somebody asked the mother if they had been to Rome.

"Say, Sadie," said the mother to the daughter, "did we go to Rome?"

"Why, mother," replied the daughter, "of course we did. Don't you remember that's where you bought the black silk stockings with the white clocks?"

Joseph Conrad, the novelist, could not speak English until he was 19.

There are 42,992 women employed underground in the mines of Japan at present, and new regulations provide that no more shall be so employed.

The hardest part about knowing some people is to conceal your opinion of them.

WRIGLEY'S

The cool, comforting flavor of WRIGLEY'S Spearmint is a lasting pleasure.

It cleanses the mouth after eating—gives a *clean* taste and sweet breath.

It is refreshing and digestion aiding.

Weatherproof

Dry batteries last longest when protected from wet or damp. Eveready Hot-Shots give you full value for your money, because they are housed in metal cases.

Before you buy a battery for ignition in exposed places, make sure it bears the name "Eveready Hot-Shot." Other batteries may resemble these famous power plants in appearance, but only Eveready can make the genuine Hot-Shot.

The Eveready Ignitor shown on the left is the longest lived single dry cell money can buy. It is for use indoors or under cover.

CHAPTER I.—Continud

Gillis rose with an embarrassed air. "Here I am talkin' 'bout you and I travellin' together. I guess you're one of them tourist fellers, and I don't suppose you want to go along with a rough-neck like me."

Donald liked this big, bluff Westerner, with his honest face and simple manner. He reached in his pocket and took out the money the sherriff had given him.

"You see that? Well, before this money is gone I'll have to find a job. And it's borrowed money, too."

Gillis studied him carefully. "Well, you got my goat in a way, but there is one thing I do know, and that is that you ain't no slicker. I'm 'bout twice your age, and I knows a good face when I sees it. I'll meet you tomorrow mornin' at the station. I'm goin' to start callin' you Donald right now. And what's more, Jack Gillis is your friend from now until hell freezes over. Good-night, Donald."

CHAPTER II.

Two days later Donald and the Westerner boarded a C.P.R. train in Montreal for the West. They were no sooner comfortably seated in their section of a tourist sleeper than they began rushing westward through the winter evening.

The days that followed were full of interest to Donald. The train roared West, running on time like a clock. They tore through towns and farming settlements and plunged into forests and hills in the northern part of Ontario. The hills dwindled when they reached Manitoba, and in Alberta Donald felt as if he were sailing over a vast sea of land.

"We'll see them old Rocky Mount'ns pretty soon," said Gillis happily. "You'll like B.C. Donald. And after you bin there awhile all hell won't pry you loose. I know, 'cause I broke away from her twice, but I always drift back. I ain't got the eddication to tell you the funny feelin' I have when I'm comin' back to her. When I see them big mount'ns loomin' up I feel sort of scrumptious inside, like I wanted to smile at everybody, and I have a hard time to keep from lettin' out a yell."

"Your power of expression needs no apology," laughed Donald.

"Forgot to tell you that I ain't goin' right through to the Coast. The Company I work for has a mill at Revelstoke that needs fixin'up. The job'll probably last 'till spring. You better stay off with me, 'cause you'll find things on the Coast pretty quiet this winter."

Gillis had played the part of host from the start, and Donald knew that if he accepted the invitation to stop off at the interior town, Gillis would insist on treating him as a guest. He felt that his new friend could not afford to pactise this lavish generosity.

Donald shook his head regretfully. "I think I'll go through to Vancouver."

Gillis arose with visible reluctance as the train drew into Revelstoke. "Well, I got to leave you, pardner."

Donald had developed a sincere friendship for the man. There was a great deal of tenderness beneath the rough exterior of this Western logger.

"I'm pretty lucky in finding a friend like you," Donald said feelingly as they shook hands.

"That's all right, my boy," Gillis replied awwardly. "I like you, and Ill sure look you up when I hit the Coast. So-long."

The sun was shining brightly as the train rushed along the edge of Burrard Inlet toward Vancouver. The lawns were a bright green, and the breeze blowing in the car-window was soft and balmy. Across the Inlet, that sparkled in the sunlight, were huge mountain-peaks, their tops covered with snow. The homecoming passengers were smiling happily, while a look of eager interest shone on the faces of those who were strangers to the Coast.

Donald paused for a moment on the corner of Granville Street while the cosmopolitan crowd flowed past him. Stolid-faced klootchmen, dressed in flamboyant colours, with baskets of clams on their backs, rubbed shoulders with the haughty, turbanned Hindu. The little brown-faced Jap darted here and there amongst the crowd. A Chinaman came swiftly around the corner of an alley, moving with a peculiar trot, a pole across his shoulders, from each end of which dangled a basket filled with fish and vegetables. Another Chinaman, with a face of true Oriental impassiveness, riding a bicycle down the street, a clay pipe jutting from his mouth, was extremely incongruous. The wide, well-paved streets and the city's general air of modernity were impressive. In common with many other Easterners, Donald had pictured Vancouver as a rough Western town.

Donald engaged an inexpensive room and at once began a search for employment. Many of the mining and logging camps were closed for the winter, and work was scarce. He applied to all the engineering firms in the city, but their answers were invariably the same: "Nothing doing until spring."

Days passed, and as late winter merged into spring there was a stir throughout the city. Men who had spent the winter in idleness were "going out" again. Loggers in their characteristic blanket shirts hanging loose outside their trousers, could be seen on all sides saying good-bye to their friends.

One morning Donald counted his rapidly dwindling cash and found that he would have barely enough to tide him over the week-end.

With all his assets in the way of clothes and jewelry in a pawnshop, he could not stave off the inevitable, and there came a day when he had not even the price of a meal. Too proud to ask for a loan, he went without breakfast and lunch.

At the logger's employment agency he was told the same old story: "Only men of experience wanted. But," the agent added hopefully, "men are going to be scarce this summer, and they will be taking on everything before long." Donald made the rounds of the engineering firms where he had applied for a position, but without success. Force of habit led him back to the employment agency, where he sank disconsolately to a bench.

A diminutive man with blond hair, bright blue eyes under shaggy brows, and his head set at a cocky angle, entered briskly and approached the wicket. "S'y, do you know where I can find an 'eavy-weight that can box a bit?" he said to the agent.

"How about those two I sent you yesterday, Andy?"

The one addressed as Andy made a gesture of disgust. "Those two blighters were as 'eavy as cows. They didn't know their right 'and from their left. I don't want any 'uman punchin' bags, I want a man that 'as a little speed. Blime me, if I was in Austrylia I could get a 'arf a dozen in 'arf a minute."

"I'm your man," said Donald stepping forward.

The small man turned. The keen eyes under the bushy, light-coloured eyebrows studied Donald carefully. "Can you box?"

"I can."

"Good! Come with me."

Donald followed the sturdy little Australian. For a few blocks they walked in silence.

"'Ad your dinner?" queried the Australian.

"No."

"We'll 'ave a bite in 'ere."

They turned into "Old Joe's" restaurant.

"Sounds good to me," observed Donald with a pleased smile.

"Been missin' a few meals, 'ave you? Order what you want," said the Australian, as they sat down to a table.

"I'll warn you that I'm hungry," cautioned Donald.

"'Op to it, my lad; about all we get in this blinkin' world is what we eat. What's your name?"

"Donald McLean."

"Mine's Andy Pettray."

Then Andy delivered himself of the following information: "I'm the manager of Bill Hagin, the Austrylian 'eavyweight. We are to fight Slugger Garrieau, The Canadian champion, in about two weeks. The Slugger is well named, as 'e is an 'eavy 'itter and it tykes a good boxer to beat 'im. I want an 'eavy man that can speed Bill up a bit, and I've 'unted this town over, but I can't find one. Now, if you can deliver the goods, you will be worth three dollars a day and your eats. What do you s'y?"

"I say 'yes,'" was the decided answer.

Andy dug into his pocket. "'Ere's three dollars to bind the bargain."

"Better wait until I earn it," suggested Donald.

"That's all right, me lad; you'll be needin' it to eat on. I ain't worryin'.

"Come to the gymnasium at the corner of Robson and Granville at two o'clock tomorrow," advised Andy as they stepped outside.

"I'll be there, and I want to thank you for your kindness."

"Forget it," smiled Andy. "I've been flat many a time myself."

"Half an hour ago I was broke and hungry," mused Donald, "and now I am well fed and have three dollars in my pocket. Great old world this." He chuckled happily as he swung down sun-splashed Cordova Street with a buoyant stride.

To Be Continued.)

GOOD ADVICE FROM MOTHER OF SEVEN

Recommends Lydia E. Pinkham's Vegetable Compound

Toronto, Ont.—"I began taking Vegetable Compound for nerves and other troubles and I must say I felt different after the first dose. I have been told this last six months that I look twenty-five, although I am now forty-seven and have had seven children. I have taken the Vegetable Compound regularly for some time and sleep well, rise early and feel young."—MRS. MCKEE, 18 Laurier Ave., Toronto, Ontario.

W. N. U. 1752

What Will you do

When your Children Cry for It

There is hardly a household that hasn't heard of Castoria! At least five million homes are never without it. If there are children in your family, there's almost daily need of its comfort. And any night may find you very thankful there's a bottle in the house. Just a few drops, and that colic or constipation is relieved; or diarrhoea checked. A vegetable product; a baby remedy meant for young folks. Castoria is about the only thing you have ever heard doctors advise giving to infants. Stronger medicines are dangerous to a tiny baby, however harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it. It may spare you a sleepless, anxious night. It is always ready, always safe to use; in emergencies, or for everyday ailments. Any hour of the day or night that Baby becomes fretful, or restless. Castoria was never more popular with mothers than it is today. Every druggist has it.

Fletcher's CASTORIA

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symtoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

TOOTH STRUCTURE

You examine the highly polished clean tooth surface and you conclude, and rightly so, that the enamel does not persist all the way through. As the bark is to the tree, so the enamel is to the tooth, its protective covering, but serving as well, the purpose of ornamentation of the tooth body.

In the tooth, this body which constitutes the main bulk of the tooth, is known as the dentine.

Then is this all? No, for as in the tree we have a pith or core, so in the tooth we find a central chamber known in the crown of the tooth, as the pulp chamber, and in the root, as the root canal.

But you have observed, too, that the enamel covers only the exposed portion of the tooth, or crown. The root, then, is protected by a covering known as cementum, which attached the myriads of fibre or "threads," that hold the tooth firmly in place in its socket.

Nature, ever wise, has constituted the enamel the hardest substance in the human body, to better withstand the stress to which it is subjected. Also, enamel does not undergo the physiologic changes of dissolution and repair to the extent of any other body tissues, hence the need of hardness as an effective barrier to injury and disease.

In the dentine are minute tubules, or canals, containing soft tissue filaments through which communication is established from the outside of the tooth to the nerve tissue of the pulp; and because of this honeycombed structure and, too, owing to dentine being softer than enamel, it is less resistant to disease than is the latter.

So you can see how important it is to keep intact the enamel which constitutes the outer defences of the tooth since disease processes, once penetrating the enamel barrier, can quickly gain access to the more vital tissues within and there proceed apace to work disaster.

German youths are not so tall now as in the pre-war days. The general decrease is about 1½ inches.

Athletes — Keep Minard's Liniment handy.

Little Helps For This Week

"And the Lord make you to increase and abound in love one toward another, and toward all men." — 1 Thessalonians iii. 12.

If any little word of mine
May make a life the brighter,
If any little song of mine
May make a heart the lighter,
God help me speak the little word
And take my bit of singing,
And drop it in some lonely vale
To set the echoes ringing.

If any little love of mine
May make a life the sweeter,
If any little care of mine
May make a friend's the fleeter,
If any lift of mine may ease
The burden of another,
God give me love and care and strength
To help my toiling brother.

God divided man into men that they might help each other.—Seneca.

Bears Well Behaved

Have Better Manners Than Any Other Wild Animal

The epicurean bears have the best table manners of any wild animal, in the opinion of Scorehum Alarid, who presides at the nightly feasts served to bruins in the park at Yosemite, Cal.

Scraps of food gathered from eating houses of the region are brought to a regular place, where bears are always waiting to be fed.

"Each evening the hungry bruins patiently wait until I have backed my truck containing their food to the platform and have set their table," Alarid said.

"When I empty the scraps on the platform they take their places. They do not guzzle their food and are not in the least disturbed by the thousands of tourists who watch them," he added.

Airplane Saved Men

A score of men without food and very little clothing, in a wild part of the Red Lake District, Manitoba, have been saved by airplane, which took emergency rations from Hudson. The plight of the men was caused by a forest fire which destroyed their cabins and supplies.

The principal difference between a "shoppe" and a "shop" is about ten bucks per garment.

Don't forget it, that self-pity is the most despicable of all vices.

Pimples Itched And Burned Badly Cuticura Healed

"Pimples broke out on my nose and spread all over my face and body. They were hard, large and red, and festered and scaled over. The pimples itched and burned so badly that I scratched, and scratching caused many eruptions. They were so painful that I could not sleep, and used to cry from the pain. The trouble lasted two years.

"I purchased some Cuticura Soap and Ointment and after using them two days I found they were helping me. I continued the treatment and after using four cakes of Cuticura Soap and three boxes of Cuticura Ointment I was healed." (Signed) Miss Lucy Kinakin, Verigin, Sask.

Make Cuticura Soap and Ointment your every-day toilet preparations and have a clear, sweet skin, soft, smooth hands, and a healthy scalp with good hair. Cuticura Talcum is unexcelled in purity.

Sample Each Free by Mail. Address Canadian Depot: "Stenhouse, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c.

Cuticura Shaving Stick 25c.

SAYS CANADA PROVED TO BE A REVELATION

Southampton, Eng.—"Canada is the best holiday country I ever struck," said Rt. Hon. J. Ramsay MacDonald, leader of the Labor Party in the House of Commons, on his arrival here after a visit to the Dominion.

In an interview he said he did not think immigration to Canada would "cure or even substantially alleviate our unemployment problem."

Discussing the British miner-harvester migration, Mr. MacDonald said:

"There is no doubt a very determined attempt is being made by certain people to spread discontent among the harvesters. It is my impression that a considerable number of the men will remain and get employment in Canada.

"From east to west in Canada the British worker is preferred to anybody else, providing he is prepared to do the work Canada requires him to do."

He expressed the opinion that the problem of winter work could easily be solved if some simple system of organization were brought into existence. Statements that Canada does not welcome British workers were untrue, he said.

"After more than twenty years absence from Canada," Mr. MacDonald remarked, "I hardly recognized places I had visited visited before. It was an absolute revelation and a good revelation to me.

"There is a vitality of expansion, a youthfulness and a hopefulness in Canada," said the former British premier. "Her weakness is that she has not got sufficient magnetic power to keep her people both Canadian born and British immigrants within her own borders.

"The great magnet that is always pulling them is the U.S., and it is of the most vital interest to Canada to devise some means whereby she can accumulate sufficient magnetic power to hold her population within her domains."

New Branch Lines

Settlers In Saskatchewan Are Promised Railway Facilities After Long Wait

Winnipeg, Man.—Settlers of Saskatchewan who have waited in some cases for as long as twenty-five years for railway services are assured of these before the end of 1929, is the annuoncement from Western Headquarters of the C.P.R. made here.

In the south section of the province a line of eighteen miles will be completed easterly from Coronach, 37 miles westerly from Wood Mountain to the Consul branch of the C.P.R.

Another branch line 12 miles easterly from Coderre will give railway services to settlers of the Lake Johnston District.

Possibly the most important of the lines are those from Hatton, Aikins and Pennant. The Hatton extension north-easterly of about eighteen miles will tap the Fox Valley country at the west side, and the line from Pennant, 24 miles south-westerly, will tap it from the east side.

From Aikins, the first station east of Swift Current on the Main Line of the C.P.R., a branch approximately 20 miles long will be sent northward. This line will eventually connect Swift Current direct with Saskatoon.

In Central Saskatchewan the following lines are being projected:

From Foam Lake, southwesterly 27 miles.

From Rosetown to Perdue, 45 miles.

From Unwin, westerly 20 miles.

Northern Saskatchewan will benefit by the 10 miles northeasterly from Lloydminster.

Reject Marketing Board Plan

Sydney, Australia.—Wheat gorwers have rejected a scheme to form a marketing board to control the sale of wheat for the next three years. A ballot to decide what course should be taken on the matter resulted in 7,453 growers opposing the scheme, while 6,026 approved it.

W. N. U. 1752

Nations Must Agree On Naval Matters

Or Conference On Disarmament Would Be Useless Says Dr. Loudon

Geneva.—An early meeting of the League of Nations preparatory commission on disarmament would be useless unless an accord on naval matters is reached among the five leading sea powers, says Dr. Loudon, president of the commission.

Dr. Loudon, who is Dutch ambassador to France, suggested that the best way to meet this condition would be through a private conference at Paris of representatives of the United States, Great Britain, France, Italy and Japan. He said such a conference might readily reach an agreement on the points respecting naval matters which now divide them.

He said that unless a working basis could be found among these powers he would not take the responsibility of re-convoking the preparatory commission except upon a direct mandate from the full assembly of the League.

Rules In Oratorical Contests Altered

Manitoba Trying To Reduce Interference With School Studies

Winnipeg, Man. — Alteration of rules for International oratorical contests, designed to reduce to the minimum interference with school studies, has been decided upon by the provincial central committee. Under the new rules, Manitoba will take part in the 1929 contest. The revised conditions are:

That the contest be open to students of grades 10, 11 and 12 only. Last year students of grade 9 were eligible.

Schools teaching any of the grades from 10 to 12 are to be asked to decide their respective champions by Christmas, by any method they determine, provided public speaking by a considerable number of the pupils is involved.

The preliminaries to the championship contest in Easter week are to be complete by the end of March. The district elimination contests are to be held before Christmas.

River Steamer Wrecked

Sinks After Hitting Huge Boulder In Peace River

Peace River.—The steamer D. A. Thomas, according to reports reaching here, is sunk 60 miles below here, broken in the midddle by a huge boulder.

Since the palatial steamer left here September 10, loaded with freight for Vermilion Chutes and other way points, navigation has been carried on under the most trying circumstances, due to the extremely low stage of water. She was on her way upstream loaded with 60 head of cattle and several passengers when disaster overtook her. The cattle swam ashore and all aboard were rescued.

The steamer Thomas was built by the late Baron Rhondda in the summer of 1915, and was one of the finest on the island waters. The material for her construction was freighted in over the old Grouard trail by teams when the end of the steel was at Reno, and her cost was upwards of $100,000.

Warns U.S. Gangsters

Toronto.—The Ontario Government, acting through the department of the attorney-general, will take immediate steps in an effort to see that United States gangsters do not commit acts of violence upon Canadian soil. Attorney-General Price has issued this warning to United States gunmen.

NOTED ENGLISH STATESMAN

The late Lord Haldane, Viscount of Cloan, noted English statesman, who died recently at the age of 72.

Loss From Damage Claims

Canadian and U.S. Railways Face Heavy Liability Each Year

Winnipeg. — Representatives of Canadian and United States Railways are meeting in Winnipeg to seek some method of reducing the enormous amount of damage claims paid for lost and damaged goods. Last year this amount totalled $38,000,000.

A great deal has been done already as was reported at the meeting. In 1920 when the railways were first aroused and took definite action the figure was $119,000,000. Since then reductions have been brought about each year. Shippers and receivers are co-operating better with the carriers and a great deal of education has been done among railway employees with a view to lessening rough handling and the other cause of loss. The American Railway Association employs three full-time special representatives to gather data on the subject and present it to the parties concerned.

Famine In Russia

850,000 Persons Will Be Fed Through Public Funds

Kharkoy, Ukraine, Soviet Russia.—Eight hundred and fifty thousand persons will be fed through public funds during the coming winter in the Ukraine, the grain crop having fallen far below the need of the population. Ordinarily the Ukraine is one of Russia's best granaries and in good years has wheat both to eat and to export.

The Moscow government has appropriated 31,000,000 rubles, the Ukrainian government 10,000,000 rubles and social service organizations have begun a campaign to raise an additional 6,000,000 rubles to provide nourishment this winter for the stricken population. One-third of the Moscow advance is a gift and the balance is a loan.

Trail Riding Popular

Banff, Alta.—Trail riding in the Canadian Rockies is increasing in popularity. In 1925 Pat Brewster had five parties on the trail. In 1926 there were 19 who took this form of pleasure as the only way in which to see the full beauty of the Rockies. Last year the number was augmented to 41, and this year it will run to about 85.

Letter Carriers' Demands

Windsor.—A boost in maximum salaries from $1 500 a year to $2,100, a seven-hour day and a five-day week comprise the main demands to be made by the Canadian letter carriers of the government as formulated by the delegates to the biennial convention of the Federated Association of Letter Carriers of Canada.

New Northern Route Is Complete Success

Was Opened By Blasting Of Montreal River Channel

The Pas, Man.—Saskatchewan's new route into the mineralized country of the far north, made available by the federal government blasting rocks out of the Montreal River in North Central Saskatchewan, is a complete success.

Hon. Thomas C. Davis, attorney-general of Saskatchewan, and Frederick MacDermid, K.C., of Saskatoon, accompanied by their wives, left Prince Albert on September 5, to make the swing around the great water half circle in the northern part of the province.

The voyage ended Tuesday afternoon, Sptember 18, at The Pas, and was a complete success in every way, only 14 days being required for the entire trip.

That the distinguished travellers were accompanied by their wives proves conclusively the ease with which the new passage can be made.

Northcott Is Apprehended

Youth Wanted On Murder Charge, Is Arrested In B.C.

Vancouver. — Gordon Stewart Northcott, wanted by the Riverside, California, authorities on a murder charge in connection with the alleged slaying of several youths on a chicken ranch, and for whom the entire Canadian West has been searched for four days, was arrested at Okanagan Landing, five miles south of Vernon, by provincial police Constable Morley Green, according to information telegraphed to Inspector Forbes Cruickshank, in charge of the Vancouver District.

The arrested youth, according to the police, did not deny his identity nor did he actually admit it. The police are certain, however, that he is the much-sought man for whom a country-wide search has been in progress for several days.

New Branch Line Opened

First Train From Melfort North Makes Journey Over C.P.R.

Melfort, Sask.—The opening of the new branch from Melfort north on the C.P.R. created considerable excitement and loud cheering when the first passenger train made its journey to the end of the steel at Edenbridge. Crowds of people greeted the "iron horse" which was quite reminiscent of the days gone by when the first trains made their journey across the western prairies.

Every station platform along the way was jammed with people who were present to greet the first train to traverse the distance between Melfort and Edenbridge over the new C.P.R. branch line. With shouts and cheers they hailed its coming, thinking, no doubt, of the benefit to be received in being linked with the outside world.

Eligible For League Posts

Geneva.—Women's rights have won still another victory. Henceforth appointments on the government boards of all international institutions which are linked with the League of Nations will be made without distinction of sex and women are now assured representation. A resolution to this effect was given unanimous approval by delegates at the league assembly. It was introduced by Dame Edith Lyttleton, of Great Britain.

Form New Association

Ottawa.—A new organization of postal employees, to be known as the "United Postal Employees of Canada" was launched here by the fifteenth annual convention of the Dominion Postal Clerks' Association.

BRITISH HARVESTERS IN ACTION

Photograph shows a group of British harvesters aiding in the gathering of Canada's 1928 bumper crop.

DEATH TOLL IN STORM AREA MOUNTS HIGH

Washington.—With death reports to the American Red Cross from the tropical hurricane area—Guadeloupe, Porto Rico, the Virgin Island and Florida—reaching 1,199, the relief plans were rushed to combat the possibility of disease and pestilence following in the wake of the storm.

Hundreds of injured are to be treated, thousands fed and additional thousands given shelter from the elements. To this end the Red Cross is directing its gigantic relief machine.

Figures reaching the Red Cross place the dead as follows: Guadeloupe, 660; Porto Rico, 106; Florida 427; Virgin Islands, 6.

Estimates of injured run into the thousands. Property damage is estimated at exceeding $150,000,000. Tens of thousands are without homes.

The chief concern of the Red Cross and local relief agencies is now centered in maintaining sanitary conditions in the area ravaged by the hurricane.

Plans were rushed to establish two camps in Palm Beach to care for refugees where they can obtain treatment for disease. Sanitary conditions in the interior of Palm Beach county were reported bad.

Governor-General Waldo Evans of the Virgin Islands, notified Red Cross headquarters that health conditions were bad but there was not immediate danger of an epidemic. United States Consul William H. Hunt, reported from Guadeloupe in the French West Indies that disease in epidemic form is feared.

Evans and Hunt both appealed for Red Cross aid in the emergency.

Henry M. Baker, National relief director for the Red Cross, arrived in Porto Rico and radioed to headquarters here that while there was no immediate danger of epidemic there, he said conditions were bad and food and clothing needed.

Looks For Better Prices

United States Farmers Are Urged To Hang On To Their Crops

Washington, D.C.—Secretary Jardine asserted in a statement released through the Republican national committee that "if Governor Smith is elected and tariff rates are reduced to the schedules of the Underwood Act, as Governor Smith forecast in his acceptance speech, the entire farm industry will be thrown into a state of utter demoralization."

He reiterated his views that wheat farmers should hang on to their crops. He said that the present price level is lower than justified, and that everything pointed to an increase.

Noting prospects of increases in this country's wheat crop, and the forecast for the biggest Canadian crop in history, he said, however, that from a world point of view the situation is about the same as last year. Shortage of rye abroad and growth of world population, he asserted, would increase foreign demand.

Plot To Kill Trotzky

Several Attempts Are Made To Assassinate Exile In Siberia

London, Eng.—The London Daily Mail says that despatches received in London revealed several attempts to assassinate Leon Trotzky, since his exile to Siberia by the Soviet government.

According to the reports, Trotzky had written letters to Christian Rakovsky, former Soviet envoy to Great Britain, describing how his cottage was besieged and how sharpshooters attacked him from trees.

Trotzky said he and his son defended their house with two sporting guns and told how the attack was repeated three successive nights.

After the failure of the sharpshooters, local authorities denied food to the Trotzky family, the latter were purported to have said. Only the kindness of friends saved them from starving.

In the regular "shopping list" of the London Zoo appear large quantities of sunflower seeds, mealworms, condensed milk and dried flies.

ABOUT THE O. S. A.

(Continued from front page)

successfully with the difficulties of modern farming and to give to farm girls such training as will make them efficient homemakers. As well as practically fitting students for farm life the course also serves as preparation for further study leading to legrees in agriculture or Domestic Science in the Provincial University.

These courses are especially adapted to the needs of the farm girl or boy who is or has been unable to gain a good education and who cannot afford time or money to go thru high school to University. No special entrance standard is maintained it being simply required that boys or girls have sufficient elementary education to unerstand and profit by the work taken.

The School is maintained by the Provincial Government and as a result there are no tuition fees, both courses are free. consequently the five months can be spent at the school for surprisingly small outlay Board books, and a small deposit to cover possible breakage of equipment, are all the necessary items of expense. Students are accommodated in modern dormitories under supervision of the teachers for the sum of $.100 a day for room and board.

The school is well equipped, efficiently staffed and in a position to give instruction in elementary academic subjects as English and mathematics so necessary to the average farm man or woman—and in practical work such as field husbandry, Livestock, poultry, farm mechanics, farm management, Agriculture, chemistry etc.

Another link has been forged in the air express services extending from the Gulf of St. Lawrence into the heart of Canada. The Canadian Pacific Express have undertaken an air express service between Winnipeg, Regina and Calgary in co-operation with Western Canada Airways and in connection with air mail routes. This means that express matter shipped from England may be picked up from incoming Atlantic liners at Rimouski, speeded by air via Montreal to Ottawa and Toronto, placed aboard westbound trains, trans-shipped to airplanes at Winnipeg, and delivered direct to the consignee at Regina or Calgary, or placed on a train again if the destination is further west, putting the shipment many days ahead of the usual service.

A six and three-quarter-pound speckled trout, a monster of its kind, has been caught on the Nipigon River by Philip L. Peterman, of Laurium Michigan. This catch will probably win the Nipigon River Bungalow Camp trophy for the record catch of the season, for none of the fish previously entered in this competition approach it in size. The winner receives a silver replica of a fish mounted on an oak pannel and an engraved gold lapel button Fishing on the Nipigon has been better this season than it has been for ten years. The regulation of the water level to prevent fluctuation has resulted in fish returning to their old haunts, and sport is now as good as it ever was.
